Data Engineer internship for 6-12 months
Digital products, 2 positions

About us

Hitachi Zosen Inova (HZI) is a global market leader in energy from waste (EfW) and renewable gas. HZI acts as an engineering, procurement and construction contractor and project developer, delivering complete turnkey plants and system solutions for thermal and biological EfW recovery. HZI’s Service Group combines its own research and development with comprehensive manufacturing and erection capabilities to support our clients throughout the entire life cycle of their plant.

Your responsibilities

The Advanced Digitalization group in the Technology and Digitalization department is developing innovative digital products to support our customers in maximizing the performance of their plants. In this role you will be supporting R&D projects contributing to setup the ETL procedures and pipelines:

- Work with data scientists and process experts to identify and specify requirements for data consolidation, data quality and data reliability
- Develop data consolidation procedures for sensor data, reports, and other sources of data
- Assess data quality and reliably and explore monitoring frameworks working with data engineers
- Develop data labelling and annotation procedures
- Develop frameworks towards automatization and pipelines working with data engineers

Your experiences

- Currently enrolled or completed BSc or MSc degree in Computer Science or related technical field
- Exposure to python from studies, internships, or any other practical experience
- Good command of English
• Self-motivation and disciplined work ethics with a strong interest in self learning

We offer

• Responsible challenge with diversified field of activity
• Team-oriented working atmosphere in an international Company
• Personal development opportunities through own Inova Academy
• Opportunity to gain an insight into various technical disciplines
• Excellent employment conditions
• Attractive working place (central, good transport links)
• Modern infrastructure
