

Surgical Fusion Technologies GmbH

Internship in Medtech – Mechanical Engineering

Join Surgical Fusion Technologies GmbH for a 6-month Mechanical Engineering Internship. Get hands-on experience in CAD, prototyping, and testing, and work with a small, innovative team in the Medtech field.

About us

Surgical Fusion Technologies (SFT) specializes in innovative orthopedic implants and instruments for soft tissue repair, utilizing our proprietary ultrasound-based SupraFusion® technology to enhance patient care. We're a small, dynamic team of 20, offering interns hands-on experience across multiple stages of product development. This is a great entry into the Medtech industry.

For more info you can check out our website www.supra-fusion.com

Role Overview

We are looking for a Mechanical Engineering Intern for the coming semester to support our R&D team in CAD design, prototyping, testing, and manufacturing of medical devices. You'll work directly with engineers, get feedback from surgeons, and help develop and optimize products for usability and manufacturability.

Why join us

- Great entry into the Medtech industry
- Gain Insights from an experienced R&D team
- Holistic company experience
- Hands-on learning
- Mentorship & growth
- Innovative & dynamic culture
- Fun and creative team with regular team vents
